CONTENTS

1	Introduction	1
1.1	Surveys in practice	1
1.2	Contributions of the thesis	6
1.3	Overview of the thesis	8
2	Adaptive survey designs and Markov decision theory: an introduction	11
2.1	Resource allocation problems	11
2.2	Markov decision theory	13
2.3	A brief introduction to sample surveys	20
2.4	Adaptive survey designs	22
3	The survey resource allocation problem	31
3.1	Problem formulation	32
3.2	Adaptive survey design policies	36
3.3	Budget and capacity constraints	39
3.4	Numerical examples	41
3.5	Concluding remarks	46
4	The survey resource allocation problem for multiple quality indicators	49
4.1	Problem formulation	50
4.2	The two-step algorithm	52
4.3	Numerical examples	58
4.4	Conclusions	63
5	The survey resource allocation problem and measurement errors	65
5.1	Measurement errors in surveys: an introduction	66

5.2	Problem formulation	68
5.3	Problem solving technique	70
5.4	Case study: the Dutch Labor Force Survey	73
5.5	Concluding remarks	85
5.6	Appendix: additional optimization results	86
6	Adaptive survey designs to minimize survey mode effects	91
6.1	Survey mode effects: an introduction	93
6.2	Problem formulation	94
6.3	Algorithm	97
6.4	Case study: the Dutch Labor Force Survey	100
6.5	Discussion	115
7	Dynamic learning in adaptive survey designs	119
7.1	Literature review multi-armed bandit problems	120
7.2	Problem formulation	124
7.3	Solving the budgeted MAB via dynamic programming	127
7.4	Simulation results	132
7.5	Discussion	138
8	Future research directions	141
	Bibliography	144
	Summary	157
	Samenvatting	161
